- WLTP data currently being approved. Minimum - maximum mixed WTLP CO2 emissions on the engine The CO2 emissions from the vehicle depend on the version selected as well as the options on the vehicle.
- **Dealer delivery related charges, metallic paint and tyre recycling levy not included.
- ***Includes SEAI grant and VRT rebate & Dealer delivery related charges, metallic paint and tyre recycling levy not included.

(1) The CO2 emissions entered are mixed and expressed in grams per kilometre. The fuel consumption and CO_2 emission values provided comply with WLTP approval (EU regulation 2017/948). Since 1 September 2018, new vehicles are approved on the basis of the worldwide harmonised light-duty vehicles test procedure (WLTP), which is a new, more realistic test procedure to measure fuel consumption and CO_2 emissions. This WLTP procedure fully replaces the New European Driving Cycle (NEDC), which was the previous test procedure. As the test conditions are more realistic, the fuel consumption and CO_2 emissions measured according to the WLTP procedure are, in many cases, higher than those measured according to the NEDC procedure. The fuel consumption and CO_2 emission values may vary depending on specific equipment, options and types of tyres. Contact your point-of-sale for more information. EQUIPMENT DETAILS

PEUGEOT i-Connect® Advanced

PEUGEOT i-Connect® Advanced offers a complete technological experience, with its powerful and efficient TomTom® connected navigation. For optimal readability, the map can be displayed on the entire 10'' HD touchscreen and updated 'over the air' (once a month) It is also fully and easily customizable with widgets, like a tablet.
"OK PEUGEOT", a natural language voice recognition command, improves safety and user comfort, and gives access to all the features. Finally, to assist the user,
PEUGEOT i-Connect® Advanced offers on-board documentation and tutorials

Pack DRIVE ASSIST PLUS

The Drive Assist Plus Package(1) allows you to manage driving semi-autonomously. With the track positioning system(2) and adaptive cruise control including the Stop & Go(3) function, it automatically adjusts the speed of the vehicle to that of the one preceding it, maintaining a safe distance.

(1) Available in series, optional or unavailable depending on versions.
(2) A system for maintaining the position of the car chosen by the driver in the lane.
(3) A system based on radar in the centre of the front bumper and a camera at the top of the windscreen.
